

## Allowing Blocked Pop-Ups

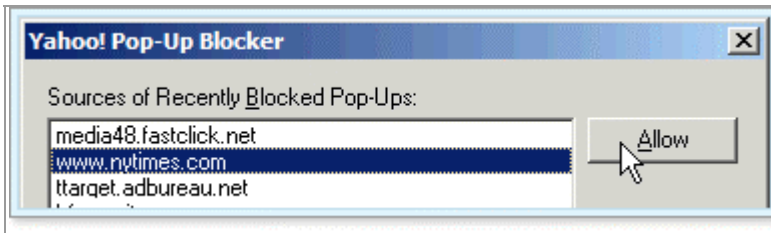

You can customize Pop-Up Blocker behavior by creating a list of allowed sources of pop-up windows, based on pop-ups that the Pop-Up Blocker has blocked during the current browser session.

### Here's How

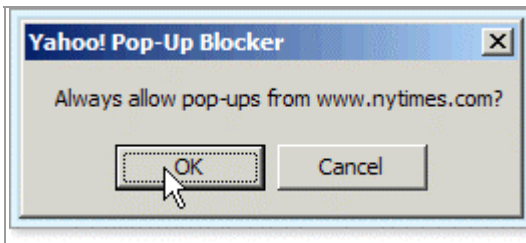

1. Select **Always Allow Pop-Ups From...** from the Pop-Up Blocker menu on the SBC Yahoo! Toolbar.

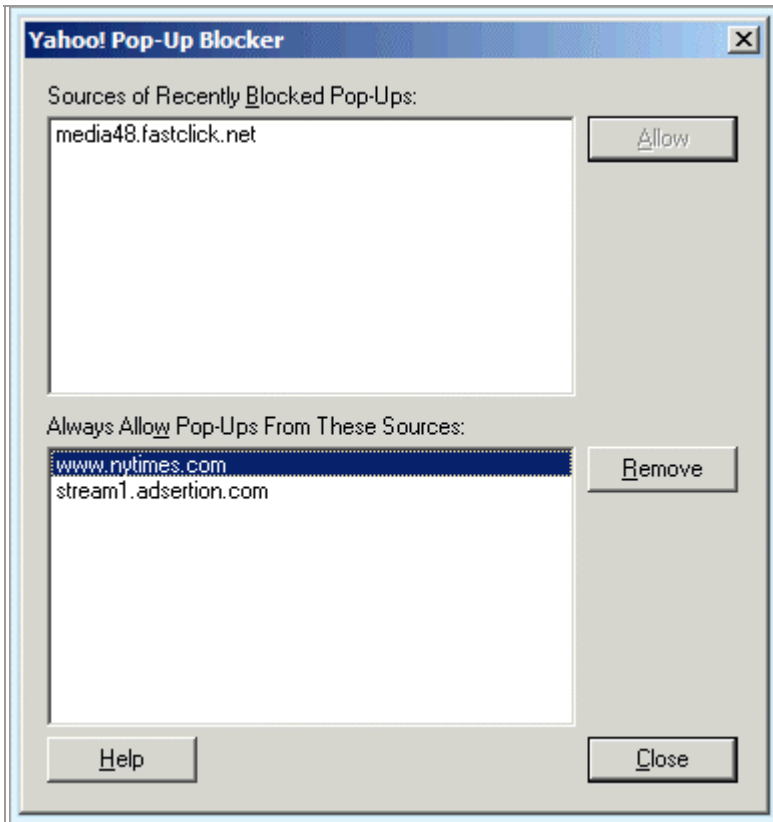

2. Select the source of pop-ups that you want to allow from the list of sources of recently blocked pop-ups at the top of the Yahoo! Pop-Up Blocker window, then click the **Allow** button.

3. Click **OK** in the dialog box that appears to confirm that you want to allow this pop-up source.

4. The selected source now appears in the list of allowed sources at the bottom of the Yahoo! Pop-Up Blocker window.

If you want to remove an item from the [allowed list](#), you can select it and click the **Remove** button.

5. Click **Close** to close the Yahoo! Pop-Up Blocker window.
